SKILLS

DEVELOPMENT

HTML5

CSS + Sass

JavaScript (ES6)

React

node.js

C/C++

Arduino

TOOLS

Git

Sublime Text

Adobe Photoshop

Adobe Premiere

EDUCATION

University of Waterloo
BSE Software Engineering 2020

INTERESTS

Drama and Acting

JS / Web Experiments

Video Gaming

Memes

Finding New Music

Guitar

PROJECTS

1212! - 1212.rocks

- Designed and Developed a novel puzzle game for desktop and mobile
- · Leveraged JavaScript, HTML5, and CSS to craft a responsive, intuitive, and user friendly web-game
- Gained a strong understanding of responsive design principles
- Maintaining a playerbase of over 7000 people each month

nfinite.space - devpost.com/software/nfinite-space

- · Imagined a cloud file-storage service that could store files without the need for a data-center
- Implemented a protocol that leveraged storage from each connected user to store parts of other users' files
- Developed a proof-of-concept in just 36 hours at Hack the North 2016, using a Go backend and a React frontend
- · Winner of the AWS Sponsor Award

Hex Grid Map Generator - prilik.ca/dicesiege

- Developed a custom map generation algorithm for a turn-based strategy web-game
- Implemented seeded terrain generation, scalable map sizes, and varied complexity options in JavaScript
- · Utilized two.js for map and UI rendering

Personal Website - prilik.ca

- User-interactivity was achieved using purely CSS3 animations
- Employed principles of responsive design to maintain optimal readability and user accessibility across both Desktop and Mobile
- Contains a list of all other personal projects developed over the years

EMPLOYMENT

Polar.meFront End Web Developer - HTML5, Sass, JS, node.js

Toronto, ON Summer 2016

- Designed and Implemented Native Advertisements for a myriad of clients, including Engadget, Wired. and AOL
- Engineered and Deployed a build system written in node.js that streamlined and automated much of Native Ad development, resulting in a significant boost to team throughput
- · Developed a Slack Bot to interface with a nascent project-management platform with a limited API

TapMango

Summer Intern - HTML5, CSS, JS

North York Summer 2015

- Utilized Phonegap to prototype customer facing mobile app for a rewards platform
- Prototype was later developed into a full app, available on the Google Play store

AWARDS

Winner of the AWS Sponsor Prize

Hack the North 2016

For work on nfinite.space

Regional 2nd Place

2015

2016

- Shalhevet Freyer International Physics SAFE Tournament
- Gained thorough understanding of Arduino programming principles and physical hardware development
- Organized a team to build a puzzle safe from the ground up
- · Designed, programmed, and implemented the electronics that controlled the safe's various puzzles

School Champion

2015

Canadian Computing Competition (CCC)
